EDUCATION

Sppu
EXTC BE

Pune
June - Present

SKILLS

Programming Languages: Python, C, C++, JavaScript
Libraries/Frameworks: JS, CSS, Tailwind, HTML, React, CSS3, PIL
Tools / Platforms: GIT, Responsive Web, Google Maps, Google Gemini API, LLaMA 3.2 / LM Studio, Edge-TTS

PROJECTS / OPEN-SOURCE

Shorts-script-genrator | [Link](#) *JavaScript, HTML5, CSS3, Google Gemini API, RESTful API Integration*
Developed a web-based tool that converts written articles into short-form video scripts using Google Gemini API.
Implemented advanced NLP-driven script generation with automated content restructuring.
Built responsive, intuitive frontend using JavaScript, HTML5, and CSS3 for seamless user interaction.

Weather-chatbot | [Link](#) *JavaScript, HTML5, CSS3, Tailwind CSS, Google Maps API, OpenWeather API, AQICN API*
Built a responsive weather and air-quality monitoring dashboard using JavaScript, HTML5, CSS3, and Tailwind.
Integrated OpenWeather and AQICN APIs for real-time environmental data retrieval.
Implemented interactive Google Maps with AQI overlay for geographic visualization.
Developed an AI-powered chat interface enabling natural-language weather queries.
Optimized UI/UX with dark/light themes and mobile-first design for scalability and performance.

Dtl-agriculture-chatbot | [Link](#) *Python, LLaMA 3.2, LM Studio, Pandas, Matplotlib, Seaborn, Real-time Data Processing*
Built an AI-powered conversational farming assistant using LLaMA 3.2 with real-time agricultural data processing.
Developed Python-based pipeline for data cleaning, analysis, and visualization of crop yields and market trends.
Implemented location-aware crop recommendation engine using regional datasets.
Created dynamic graph generation system using Matplotlib/Seaborn for actionable insights.
Designed modular architecture separating NLP, data processing, and visualization components.

Geopolitics Reel Automation System*Google Gemini API, Edge-TTS, MoviePy, Feedparser, PIL, Python, JSON Schema, Meta Graph API, RSS Feeds, ImageMagick, Google Generative AI, Requests, SRT Generation*
Built an automated system to generate 30-sec multilingual geopolitics reels using Google Gemini and Edge-TTS.
Developed modular pipeline for news fetching, script generation, TTS, image creation, subtitles, and video assembly.
Implemented Neuro-Hook structured scripts (Cortisol Spike Dopamine Bridge Serotonin Payoff Open Loop).
Automated reel publishing via Meta Graph API with optional batch scheduling.

Pattern-Path | [Link](#) *HTML, Python, JavaScript, CSS*
PatternPath is a free, pattern-based learning platform that helps engineering students learn once, revise intelligently,
